Seasonal Storage Box Labels

The winter gloves are in a box. Somewhere. These labels turn "somewhere" into a shelf, a box number, and a five-second find.

1. Pack a box fully before hiding it away: tape one item inventory as you go.
2. Give each box a season, a number, and a shelf, then stick the label on top AND one side.
3. Stack all boxes the same way, numbers facing out, heavy ones on the bottom.

Tip: for bulky bins you cannot see into, tape the label inside the clear plastic facing OUTWARD instead of the lid.

Two labels per box (top and side) means you read one even when the boxes are stacked. Pack what you need every year ON TOP of what you only need every few years.
